Statement on emergency event

An overheat incident was identified within the boiler system at Grupa Azoty Zakłady Azotowe Kędzierzyn S.A.'s ammonia unit site. The unit was promptly and safely shut down to prevent any potential danger to people and the environment.

As of September 6th 2023, the unit is in the final phase of the cooldown procedure. An inspection of the interior of the apparatus is currently in progress. The precise duration of the repair work can be determined once the required scope of work is fully established. The objective is to restore the operation of the unit as soon as possible.

There has been no danger to the employees or residents of Kędzierzyń-Koźle county.
